Re: Interchange Improvements I-195/Taunton Avenue/Warren Avenue
Phase I Environmental Site Assessment
East Providence, Rhode Island
PBA 04137

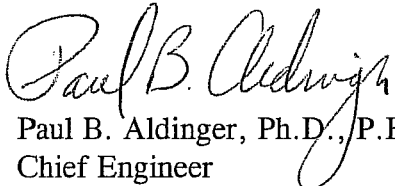

Dear Ms. Chlebek:

Paul B. Aldinger & Associates, Inc. is pleased to submit this Phase I Environmental Site Assessment for the above-referenced project in accordance with our proposal dated August 18, 2004. The report is subject to the limitations that are outlined in Section 8.00 and Appendix A.

It has been a pleasure to have been of service to Gordon R. Archibald, Inc. Please contact the undersigned if you have any questions concerning this report.

Very truly yours,

PAUL B. ALDINGER & ASSOCIATES, INC.

Paul B. Aldinger, Ph.D., P.E.
Chief Engineer

1.00 INTRODUCTION

In accordance with our revised proposal to Gordon R. Archibald, Inc. (GRA) dated August 18, 2004, Paul B. Aldinger & Associates, Inc. (PBA) has completed a Phase I environmental site assessment of a location in East Providence where the Rhode Island Department of Transportation (RIDOT) is planning roadway/traffic improvements.

The overall project consists of improvements to Interstate Route 195 (I-195) and the Taunton Avenue and Warren Avenue Interchanges for the City of East Providence and the RIDOT. The purpose of the proposed project is to provide improved highway access between I-195 and the waterfront area along the Seekonk River. Current plans for the waterfront area include redevelopment with office, research and development, hotel, residential, and retail facilities. The principal objective of the project is to study alternatives for improved access from the waterfront area to I-195. An overall Environmental Assessment (EA) of the alternatives is required by the Federal Highway Administration.

The study area is indicated on Figure 1, Site Vicinity Plan. The purpose of our assessment was to research and review available site information and then render an opinion as to whether oil or hazardous materials are likely to be present in soil or groundwater at the sites, as it may impact the planned construction at the subject locations. It is our understanding that discussions between staff at RIDOT and the RI Department of Environmental Management (RIDEM) concluded that RIDOT would not generally be responsible for contamination clean-up within RIDOT's right-of-ways. The activities conducted at the project locations under this contract were therefore limited to an assessment of construction impacts due to the possible presence of oil and hazardous materials in soil and groundwater, rather than the longer term ownership liabilities typically assessed during the course of preacquisition site assessments conducted for real estate transactions.

This report and our conclusions and opinion are subject to the limitations contained in Section 7.00 and Appendix A.

2.00 BACKGROUND

This section describes the physical layouts, hydrogeologic settings, and historical uses of properties of potential environmental concern abutting the proposed construction locations. A list of individuals and agencies contacted to acquire this information is attached in Appendix B. Key site features are presented on Figures 2 through 4.

2.10 LOCATION DESCRIPTIONS AND EXPECTED CONSTRUCTION ACTIVITIES

We reviewed three sets of plans illustrating the possible alternatives proposed by GRA to develop an understanding of the nature of reconstruction/improvements for each alternative. These three alternatives are presented on Figures 2, 3, and 4, titled Waterfront Drive - 1, Waterfront Drive - 2, and Veterans Memorial Parkway - 1, respectively. In addition, a drive-by survey of abutting

facilities was conducted. Descriptions of the proposed construction activities and the nature of abutting facilities are presented below.

2.11 Waterfront Drive - 1

A new roundabout is proposed at the intersection of Veterans Memorial Parkway and Mauran Avenue, construction of this roundabout will require the acquisition of four buildings and will require improvements to the existing roadway alignment to the southwest along Veterans Memorial Parkway, west along Mauran Avenue to Waterfront Drive, east along Mauran Avenue, and northeast along Veterans Memorial Parkway connecting to the Taunton Avenue Interchange. Currently the abutting properties are Lucien's Auto Service located east of the proposed roundabout, the Chapel Building Corporation located west of the proposed roundabout, and several residences located to the northwest, northeast and southeast of the proposed roundabout.

Improvements are also planned at the existing I-195 and Warren Avenue Interchanges. A new on-ramp to I-195 East is proposed at the existing Warren Avenue Interchange; a new retaining wall will be constructed to separate the new I-195 Eastbound on-ramp and School Street, and reconstruction of the Potter Street and Purchase Street overpasses will be required to accommodate the increased span over the new on-ramp. The proposed improvements will require excavations along the entire length of the on-ramp, and at the locations of the new overpasses. Currently the adjacent property consists of Saint Mary's Episcopal Church, located directly across the street from the existing Warren Avenue on-ramp, the Asiana Food Market is to the east of the on-ramp, and a vacant lot is to the west.

A proposed extension is planned for Taunton Avenue between Water Street and Valley Street to allow access to the improved Waterfront Drive, which runs parallel to the Seekonk River. This proposed extension will require the removal of a section of Valley Street from Warren Avenue north to Taunton Avenue.

A new off-ramp is proposed from I-195 West that will provide access to the proposed Waterfront Drive Extension. This new off-ramp begins at the existing Taunton Avenue off-ramp from I-195 East and will require the construction of a new overpass and retaining walls along either side of the new off-ramp.

New roadway alignments are also proposed which will connect Taunton Avenue to the proposed Waterfront Drive extension and Valley Street. Excavations will be required along the entire length of the off-ramp, and at the location of the new overpass. Currently there is a vacant lot (formerly Fox Fertilizer) located immediately west of the Valley Street and Taunton Avenue intersection, to the south is I-195, and to the north and northeast is the Organics Dyestuffs Corporation. There is also the American Equipment and Fabricating facility located west of the vacant lot adjacent to the Taunton Avenue and Valley Street intersection.

2.12 Waterfront Drive - 2

The plans for this option are the same as for the Waterfront Drive - 1 option, with the following change:

The proposed new off-ramp from I-195 West that will give access to the proposed Waterfront Drive Extension begins just to the west of the new Purchase Street overpass. New retaining walls will extend along either side of the new off-ramp and two additional overpasses will be required at the Taunton Avenue off-ramp from I-195 East and the Warren Avenue on-ramp to I-195 West. Currently the abutting properties are residences located along Freeborn Avenue to the north of I-195.

2.13 Veterans Memorial Parkway - 1

This alternative includes the construction of the new roundabout at the intersection of Veterans Memorial Parkway and Mauran Avenue. However, improvements along Veterans Memorial Parkway will extend to the northeast of the roundabout to the connection with I-195.

A new bike path is also planned to parallel Veterans Memorial Parkway from the Washington Bridge, past the new roundabout, and will join the existing East Bay Bike Path to the south of First Street.

New ramps are proposed from Warren Avenue to I-195 East and from I-195 West to Taunton Avenue and Veterans Memorial Parkway. The new ramp to Veterans Memorial Parkway overpasses I-195 in both directions. New retaining walls are planned on either side of each ramp. The Potter Street Bridge is removed under this alternative, bisecting Potter Street at I-195. The Purchase Street overpass would be reconstructed and the existing Warren Avenue I-195 West ramp would be removed. Two new bridges over Warren Avenue will be required to accommodate the connection to Veterans Memorial Parkway. Excavations will be required at the location of the four new overpasses and along the entire length of a new retaining wall separating the new ramps and I-195.

An extension to Waterfront Drive running parallel to the Seekonk River is planned. However, Taunton Avenue will be extended beyond Valley Street to Waterfront Drive, without requiring the removal of the Valley Road section as in the other alternatives.

2.20 TOPOGRAPHY AND DRAINAGE

Available USGS topographical maps of each section of the overall project were reviewed to assess topography and the likely direction of groundwater flow in the vicinity of proposed construction activities. Subsequent references in this report to upgradient or downgradient directions in relation to each location are relative to the anticipated direction of groundwater flow. It should be noted that localized gradients across individual locations are likely to vary due to subsurface heterogeneities, the presence of underground utilities, and variations in areal recharge rates.

According to the 1987 USGS Topographical Map of the Providence, Rhode Island - Massachusetts Quadrangle, the topography in the vicinity of the proposed Veterans Memorial Parkway roundabout slopes slightly downward to the northwest towards the Seekonk River, which is located approximately 900 to 1000 feet northwest of the intersection of Veterans Memorial Parkway and Mauran Avenue. It is anticipated that groundwater flow in the vicinity of this intersection follows the topography and heads northwest towards the Seekonk River.

The topography in the vicinity of the proposed Waterfront Drive Extension, north of I-195 West, slopes slightly downward to the northwest towards the Seekonk River. The Seekonk River is located approximately 500 to 600 feet to the northwest of the of the proposed extension. It is anticipated that groundwater flow follows the topography and heads northwest towards the Seekonk River.

The topography in the vicinity of the proposed Warren Avenue and Taunton Avenue Interchanges slopes slightly downward to the north and the west towards the Seekonk River, which is located approximately 1300 to 1400 feet northwest of the connection of these interchanges with I-195. It is anticipated that groundwater flow in the vicinity of the ramps follows the topography and heads northwest towards the Seekonk River.

2.30 SITE HISTORY

PBA sought historical information from the Office of the East Providence Tax Assessor and the Rhode Island Historical Society. In addition, aerial photographs were reviewed for historical information pertaining to development of the area.

2.31 Tax Assessor Records

The City of East Providence Tax Assessor Records were reviewed to assess the nature and time frame of prior ownership of abutting facilities. Properties which may use and/or store petroleum products and/or hazardous materials were identified and categorized. Descriptions of our findings by location are provided in the tables below.

2.31.1 Veterans Memorial Parkway Roundabout

| Facility | Address or Location Description | Owner & Acquisition Date |
|--|--|---|
| Tockwotton Home (formerly Penn Central Co.) | Lot 7, Map 16 99 Mauran Avenue | Tockwotton Home 2004 |
| Unocal | Lot 5, Map 6 1 Pier Road | Union Oil Company of California 2003 |

2.31.2 Warren Avenue Interchange

| Facility | Address or Location Description | Owner & Acquisition Date |
|---|--|---------------------------------|
| Johnny's Auto Repair (formerly Glanville Property) | Lots 10 & 11, Map 106 109-111 Warren Avenue | John & Leonor Rodrigues 2004 |

2.31.3 Waterfront Drive Extension/ Taunton Avenue Interchange

| Facility | Address or Location Description | Owner & Acquisition Date |
|--|--------------------------------------|---|
| American Equipment & Fabricating Corporation | Lot 1, Map 16 100 Water Street | AGR Properties, Inc. 1987 |
| Organic Dyestuffs Corp. (formerly Fox Fertilizer) | Lot 3, Map 16 62-78 Valley Street | Narragansett Realty Corp. 2000 |
| William J. Cannan, Inc. (formerly Kraus Chemical Co.) | Lot 7, Map 105 156 Valley Street | N&N Realty, LLC 2003 |
| Exxon Gas Station | Lot 1, Map 106 69 Taunton Avenue | Alliance Energy Corporation 1996 |
| Red Bridge Properties, Inc. | Lot 17, Map 105 1 Waterman Avenue | Red Bridge Properties, Inc. 1984 |
| Providence & Worcester Railroad Co. | Lot 2, Map 105 Waterman Avenue | Providence & Worcester Railroad Co. 2003 |

2.32 Sanborn Fire Insurance Maps

Available Sanborn Fire Insurance maps (dated 1900, 1921, 1935 (revised 1951), and 1956 (revised 1972)) at the Rhode Island Historical Society were reviewed to assess historical uses of areas surrounding the project locations. These maps often indicate locations and uses of buildings, locations of fuel tanks, and other features of interest relative to fire control. Descriptions of observed features on these maps are indicated below.

2.32.1 1900 Sanborn Map

- The 1900 Sanborn map indicates a steel-truss swing bridge spanning the Seekonk River originally built in 1885 and surrounding streets, the current location of the new

Washington Bridge and I-195, as well as other streets within the vicinity of the project area. Immediately south of the bridge and west of Water Street is a pier occupied by the C. Frazer & Son, a coal and wood business.

- A hay and grain storage warehouse, a feed and grocery storage building and other commercial stores were located on the southern end of Valley Street. Further north along Valley Street, development consisted of a paper tube factory, residential dwellings and stables. A mattress factory and produce warehouse were also shown at the property later occupied by the Fox Fertilizer Co. Residences were shown at 100 Water Street, which is currently occupied by American Equipment & Fabricating Corporation.
- The map also indicated that the multi-story buildings near the intersection of Taunton Avenue and Warren Avenue appear to be predominantly commercial storefronts on the lower level with residential dwellings on the upper floors. Further east along Warren Avenue and Taunton Avenue development consisted mostly of residential dwellings. The map also indicates a residential dwelling was located at 69 Taunton Avenue which is currently occupied by the Allied Exxon gas station.
- The 1900 Sanborn map also shows a railroad turntable for the New York, New Haven & Hartford Railroad located at the end of Mauran Avenue, which is currently occupied by Tockwotton Home. Also indicated on the railroad property are repair stalls and tool houses. Land located east of the Mauran Avenue and Second Street intersection had not been developed by this time and further to the east and west of the intersection along Mauran Avenue was residential. Just south of the intersection of Mauran Avenue and First Street a Gas Storage facility and a repair shop are indicated.

2.32.2 1921 Sanborn Map

- The 1921 Sanborn map indicated similar features as shown on the 1900 Sanborn map. Additional residences are indicated along Taunton Avenue, Warren Avenue, Mauran Avenue, and Valley Street on the 1921 map. A building near the intersection of Warren Avenue and Brow Street is occupied by an auto painting business. A fire station with a 280-gallon underground gasoline storage tank is shown adjacent to the City Hall building on Taunton Avenue.
- A 200-gallon underground gasoline storage tank is shown adjacent to the hay and grain storage buildings located at 132 to 156 Valley Street. An underground gasoline storage tank of unknown volume is indicated at 131 Valley Street, a notation on the map indicates that this tank was not in use. The coal and wood business located on the pier to the south of the Washington Bridge has been replaced by Rhode Island Oyster Farms Company.
- The Barrington Parkway had been constructed intersecting Mauran Avenue and Second Street by this time. The Providence Gas Company has a facility with pumps adjacent to

the intersection of the Barrington Parkway and First Street. Two 1000-gallon underground gasoline storage tanks are shown at 368 Warren Avenue.

- A 500-gallon underground tank reported to store gasoline was located at 38 Taunton Avenue and an underground gasoline storage tank of unknown quantity was located at 77 Taunton Avenue. Fox Point Warehouses, Inc., a cotton warehouse, is shown to be located at 26 to 54 Valley Street.

2.32.3 1935 Sanborn Map (Revised 1951)

- The 1935 Sanborn map (with the latest revisions added in 1951) indicated similar features as shown on the 1921 Sanborn map. The map also indicated the location of the new Washington Bridge recently completed in 1930, north of the old swing bridge which had been removed.
- A dry cleaners is located at the intersection of Warren and Burgess Avenues. Additional residences are indicated southwest of the Mauran Avenue and Veterans Memorial Parkway (formerly named the Barrington Parkway) intersection. An auto sales and service station business is located east of this intersection. The map also indicated that an electric transfer station operated by Narragansett Electric Company had been constructed south of the Veterans Memorial Parkway and Second Street intersection. The old railroad turntable for the New York, New Haven & Hartford Railroad at the end of Mauran Avenue had been removed and the Providence Concrete Corporation occupied the property.
- The map also indicated that a gasoline filling station had been constructed at 69 Taunton Avenue and buried underground gasoline storage tanks were located in the center of the site, an auto sales and service station was present at 57 to 63 Taunton Avenue and a chemical factory was present at 86 Valley Street.

2.32.4 1956 Sanborn Map (Revised 1972)

- The 1956 Sanborn Map (with most recent revisions added in 1972) indicated the locations of I-195 and the new westbound Washington Bridge completed in 1968, located north of the old Washington Bridge.
- The map also showed the Fox Fertilizer facility located on Valley Street (44 to 84 Valley Street), a transformer yard located at 59 Valley Street and a drilling contractor yard had been constructed at 100 Water Street.
- The gasoline station located at 69 Taunton Avenue had been razed and rebuilt at the back of the lot and a gasoline station had been constructed at 77 Taunton Avenue.

2.33 Aerial Photographs

Aerial photographs of the site and surrounding area dated 1939, 1951, 1962, 1965, 1970, 1972, 1975, 1976, 1981, 1988 and 1992 were available. The photographs were reviewed to assess changes in general land use in the area of the site. It is not possible to discern features of environmental concern on the site such as storage drums, etc. Location-specific observations from the photos are described below.

2.33.1 Veterans Memorial Parkway Roundabout

The 1939 photograph indicated a vacant lot located northeast of the Mauran Avenue and Second Street intersection. The photo also indicated homes are present to the southeast, southwest, and northwest of the Mauran Avenue and Second Street intersection. An above ground storage tank was also shown to be located at 99 Mauran Avenue (Tockwotton Home).

The 1951 photograph indicated the construction of an Auto Dealership located to the northeast of the Mauran Avenue and Barrington Parkway intersection.

The 1962 photograph indicated the newly constructed I-195 with two new interchanges connecting to Taunton Avenue and Veterans Memorial Parkway. The photo also indicated that a new parking lot had been constructed southeast of the Mauran Avenue and Veterans Memorial Parkway intersection.

No significant changes in development or land use patterns are apparent in the 1965, 1970, or 1972 photograph.

The 1975 photograph indicated the removal of the above ground storage tank located at 99 Mauran Avenue.

No significant changes in development or land use patterns are apparent at the Veterans Memorial Parkway and Mauran Avenue intersection in the 1976, 1981, 1988, and 1992 photographs.

2.33.2 Warren Avenue Interchange

The 1939 photograph indicated the Washington Bridge built in 1930 connecting Providence to East Providence located to the north of the old steel swing bridge. The photograph also indicated the location of the existing Warren Avenue off-ramp, and a vacant lot adjacent to the off-ramp. The photograph also indicated the presence of homes on Warren Avenue across from the off-ramp.

No significant changes in development or land use patterns are apparent in the 1951 photograph.

The 1962 photograph indicated the newly constructed I-195 connecting to the original Washington Street Bridge. The Potter Street and Purchase Street overpasses, and new interchange alignments for I-195, were also indicated in the photograph.

No significant changes in development or land use patterns are apparent in the 1951, 1965, 1970, 1975, 1976, 1981, 1988, 1992 photographs.

2.33.3 Waterfront Drive Extension/ Taunton Avenue Interchange

The 1939 photograph indicates commercial buildings are located along Valley Street. Also indicated is the Washington Bridge, located to the north of the old steel swing bridge. A residence is located at the current location of the Allied Exxon gasoline station. A vacant lot is located along Water Street immediately to the north of the new Washington Bridge.

The 1951 photograph indicates a contractor's equipment yard is located along Water Street immediately to the north of the Washington Bridge.

The newly constructed I-195, Taunton Avenue interchange, Potter Street and Purchase Street overpasses are evident in the 1962 photograph. The photograph also indicates new commercial buildings were constructed at the contractor's equipment yard on Water Street and along Valley Street.

The 1965 photograph indicates the presence of a new gasoline station (Allied Exxon) on Taunton Avenue.

The 1970 photograph indicates the newly constructed second Washington Bridge on I-195, just north of the old existing bridge which carries eastbound traffic. The new bridge was constructed to accommodate westbound traffic on I-195. Also evident on the photograph is the Fox Fertilizer plant located on Valley Street.

No significant changes in development or land use patterns are apparent in the 1972, 1975, 1976, 1981, 1988, 1992 photographs.

3.00 PUBLIC AGENCY INFORMATION CONCERNING PROJECT LOCATIONS

PBA staff interviewed state and local officials and reviewed United States Environmental Protection Agency (USEPA) lists and state agency files for information pertaining to the possible release of oil or hazardous materials at the site. Some of the information was developed by telephone contact; other information is the result of direct interviews and visits.

The information made available to us during these visits, interviews and file reviews is summarized in the following paragraphs. Individuals contacted for site specific information and their affiliations are identified in Appendix B.

It should be noted that records obtained may be subject to review or editing by these contacts prior to release to us. Furthermore, these records may not be all inclusive since all releases, existing tanks, tank closures, and other incidents may not be reported to the appropriate agencies, and therefore, not on record. Additionally, we have no assurance that all of the files were made available to us.

3.10 CITY AGENCY FILE REVIEW

In addition to the city or town departments contacted for historical information, we contacted the Department of Public Works for the project location.

Mr. Charles Hampton of the East Providence Department of Public Works informed us that all houses in the project area are connected to public water and municipal sewer. Mr. Hampton also indicated that all the streets in the project area were connected to storm drains, with the exception of Pier Street located at the end of Mauran Avenue which has neither storm drains nor city sewer.

3.20 STATE AGENCY FILE REVIEW

PBA completed a database search for sites and facilities with the following classifications:

- EPA's National Priority List (NPL) of Federal Superfund Sites;
- EPA's list of CERCLIS Sites designated for possible investigation;
- Leaking Underground Storage Tanks (LUSTs);
- Emergency Response incidents and spills involving oil or hazardous materials;
- RCRA-registered facilities that treat, store, transport or dispose of hazardous wastes, and those RCRA facilities subject to corrective action enforcement;
- Sites undergoing remedial efforts under RIDEM oversight;
- Registered Above-Ground or Underground Storage Tanks (USTs);and
- Solid Waste Landfills.

The search was conducted using the database maintained by the FirstSearch Technology Corporation. Search radii were in accordance with ASTM procedures. The results of the database search were reviewed to assist us in identifying files for further review at the Rhode Island Department of Environmental Management (RIDEM). Our findings are summarized in the sections below and we have included the full FirstSearch results in Appendix C. We utilized the FirstSearch identification numbers, where applicable, to identify the various properties included in the summaries on Figure 5. Where FirstSearch identification numbers were not available, alphabetic designations were assigned for map identifications. Table 1 provides a listing of the identification numbers and alphabetic designations assigned to each property along with the facility name and street address.

3.21 RIDEM Division of Site Remediation

3.21.1 CERCLIS Section

We reviewed the National Priority List (NPL) Sites and/or sites designated for possible investigation under the Federal Superfund program compiled by the USEPA under the 1994 Comprehensive Environmental Response, Compensation and Liability Act Information System (CERCLIS). We also reviewed the listing of state and federal hazardous waste sites maintained by the RIDEM. Sites which are located within one-quarter mile of the proposed construction are reported below.

There were no sites registered on the NPL within 1-mile of the proposed construction areas. There was one CERCLIS hazardous waste site in the vicinity of the project site and is provided below:

| FirstSearch Identification Number | Facility | Address | Status |
|--|---|--|--|
| 2 | Koppers Company, Providence Plant | Route 195 Highway Interchange off Massasoit Ave. | Archived No Further Remedial Action Planned (NFRAP) |

3.21.2 Leaking Underground Storage Tank (LUST) Section

Three sites in the vicinity of the project were listed by RIDEM's Division of Site Remediation as LUST facilities, as indicated below:

| FirstSearch Identification Number | LUST Facility | Address | Presumed Hydrologic Position Relative to Site |
|--|---------------------------|-------------------|--|
| 223 | Glanville Property | 111 Warren Avenue | 0.05 miles east - upgradient |
| 7 | AGR Properties | 100 Water Street | 0.02 miles west - downgradient |
| 24 | Exxon Gasoline Station | 69 Taunton Avenue | 0.15 miles east - upgradient |

Additional site reports and records were available in RIDEM files for the Glanville Property, AGR Properties, and the Exxon Gasoline Station on Taunton Avenue. A summary of this information is provided below and on the following page.

- **File No. 1080- LS, Glanville Property, 109-111 Warren Avenue**, located on Assessor's Map 106, Block 24, Lots 10 and 11. The owners are listed as John and Leonor Rodrigues. The building on Lot 10 is presently occupied by Johnny's Auto Repair. This building was used in the past as a gasoline station. Another small building on Lot 11 appears to be unoccupied.

In 1986, three underground storage tanks (UST), one 1,000-gallon waste oil and two 2,000-gallon gasoline tanks, were removed. A Certificate of Closure for Underground Storage Facilities is on file for these tanks at the RIDEM. In March 2000, a Phase II Subsurface Investigation was conducted by Sage Environmental, Inc. (SAGE) of Pawtucket, Rhode Island. Soil borings were conducted and monitoring wells were installed during this investigation. Lab tests for volatile organic compounds (VOC) and petroleum hydrocarbons indicated soil and groundwater contamination.

In July 2000, a Site Investigation Report was prepared by SAGE. At that time, additional borings were conducted and additional monitoring wells were installed to define the extent of contamination. In December 2001, an estimated 130 cubic yards of petroleum-impacted soil was excavated and removed from the site and replaced with clean fill. Groundwater monitoring has been conducted quarterly since the removal of the contaminated soil and is ongoing at the present time. The latest Groundwater Monitoring Report on file, for the period August 1, 2004 through November 30, 2004, indicated that the objectionable groundwater impact appears to be limited to the site. The status of this site is listed as "Active" by the RIDEM.

- **File No. 1011- LS, AGR Properties, Inc., 100 Water Street**, located on Assessor's Map 16, Block 1, Lot 1, presently occupied by American Equipment & Fabricating Corporation and Fleet Environmental Services, LLC.

In 1988, an Underground Injection Control order was issued by the RIDEM for disposal of wash water from a wash stand used to clean vehicles in the yard. Observation wells were installed and one is monitored annually.

In August 1990, contaminated soil was encountered while removing an underground storage tank caused by prior leakage or spillage. The soil was removed and disposed of at an off-site facility in September 1990. The file lists this site as SRO (Soil Removal Only) and is no longer active.

- **File No. 1047-LS, Exxon Gas Station, 69 Taunton Avenue**, located on Assessor's Map 106, Block 10, Lot 1, currently owned by Alliance Energy Corporation. An Exxon service station is currently operating on the site. There are three 10,000 gallon underground storage tanks (UST) and four gasoline dispensing pumps.

In March 1995, soil borings were taken on the site by Geological Services Corporation to obtain geotechnical information for new construction. In the process, petroleum

hydrocarbon impacted soil was encountered.

In August 1995, the old UST's were removed and replaced with the current UST's. During removal of the former tanks, approximately 1,000 tons of contaminated soil was excavated and removed from the site. Monitoring wells were installed and an Extended Soil Vapor Extraction Pilot Program was performed. Based on the test results, the RIDEM issued a letter in March 1999 stating that "no further action" is required at this site. The status of this site is now listed as Inactive.

3.21.3 Oil Spills and Hazardous Material Incidents

3.21.3a Oil and Petroleum Spills

There were 14 Spill Reports along the project alignment on file at the RIDEM Division of Site Remediation. A summary of these is provided below, separated by proposed construction area.

| Veterans Memorial Parkway Roundabout | | |
|--------------------------------------|---|---|
| FirstSearch Identification Number | Spill Report Location | Spill Description |
| 180 | Tockwotton Home 99 Mauran Avenue | 30 gallons of unspecified material was spilled on August 22, 2000 and 2,000 pounds and 50 gallons of unspecified materials were found on September 19, 2000. This site is downgradient from the project location. |
| 190 | 28 Boston Street | Oil/degreaser was spilled from four 55-gallon drums on October 18, 1995. This site is downgradient from the project location. |
| 204 | Unspecified Address Pier Road (Near River) | Two transformers were dumped in November of 1994. This site is downgradient from the project location. |
| Warren Avenue Interchange | | |
| FirstSearch Identification Number | Spill Report Location | Spill Description |
| 193 | 51 North Phillips Street | 10 gallons of paint was spilled from 5 containers on July 6, 1998. This site is up-gradient from the project location. |

| Warren Avenue Interchange | | |
|---|--|---|
| FirstSearch Identification Number | Spill Report Location | Spill Description |
| 195 | 82 Warren Avenue | 10 gallons of hydraulic oil was spilled from a bus on March 3, 1995. This site is upgradient from the project location. |
| 201 | EP Fuel Oil 144 Freeborn Avenue | 30 - 40 gallons of No. 2 fuel Oil was spilled in a basement from a return line leak in January 28, 1994. This site is upgradient from the project location. |
| A | 51 Seventh Street | 1 gallon of heating oil spilled from an overflowing oil tank on May 18, 2000. This site is upgradient from the project location. |
| 188 | 220 Warren Avenue | An unknown volume of fuel oil was found on the road in September of 1995. This site is upgradient from the project location. |
| B | 199 South Hull Street | 10 gallons of oil was spilled from a leaking delivery hose onto the road where it flowed into the storm drain in July of 2000. This site is upgradient from the project location. |
| Waterfront Drive Extension/Taunton Avenue Interchange | | |
| FirstSearch Identification Number | Spill Report Location | Spill Description |
| 24 | Exxon Gas Station 69 Taunton Avenue | 10 gallons of gasoline was spilled on April 30, 1998. This site is upgradient from the project location. |
| 205 | Unspecified Address Valley Street | An unknown volume of dye was found on November 26, 1996. This site may be upgradient from the project location. |
| 37 | Warren Petroleum 101 Taunton Avenue | 2 gallons of oil was spilled from a building on April 15, 1994. This site is upgradient from the project location. |

| Waterfront Drive Extension/Taunton Avenue Interchange | | |
|--|--|--|
| FirstSearch Identification Number | Spill Report Location | Spill Description |
| C | Corner of Waterman Avenue and Massasoit Avenue | An unknown quantity of petroleum oil was spilled into road and storm drains in October of 2001. This site is cross gradient from the project location. |

3.21.3b Hazardous Material Incidents

There were three Emergency Response Reports on file with the RIDEM Division of Compliance and Inspection. The first one dated May 28, 2001 stated that a dump truck rolled over and spilled fuel and oil onto the road underneath the Potter Street overpass on I-195 West. According to the report, the Fire Department responded and applied absorbent material. The report also stated that Clean Harbors responded to the incident.

The second Emergency Response Report on file, dated January 21, 1991, stated that a storage tank at the "Union Oil Company of California" facility on Pier Road was releasing Naphtha (solvent) into a containment dike through a hole in the bottom of the tank. According to the report, the spill was fully contained in the containment dike. Clean Harbors responded to the incident and used a vacuum truck to pump out the containment dike. The tank was drained and repairs were made.

The third Emergency Response Report on file, dated February 18, 1998, stated that a car parked at the intersection of Warren Avenue and Fifth Street was leaking transmission fluid onto the street and into a storm drain. According to the report, Speedy Dry was placed on the spill where the car was located and no further action was taken.

3.22 RIDEM Division of Waste Management

3.22.1 RCRA Section

The 1964 Resource Conservation and Recovery Act (RCRA) requires facilities that treat, generate, handle, transport, and dispose of hazardous wastes to be registered with the EPA. RCRA registration in Rhode Island is handled through RIDEM, as authorized by the EPA. RIDEM maintains files of RCRA statute violations, as well as incidents at RCRA facilities that may have involved hazardous wastes.

3.22.1a - Veterans Memorial Parkway Roundabout

There are four facilities in the vicinity of the subject intersection that are included

on the RCRA as listed below.

| FirstSearch Identification Number | RCRA Facility | Address | Presumed Hydrologic Position Relative to Site |
|-----------------------------------|---------------------------------|------------------------------|---|
| 36 | Lucien's Auto Center, LLC | 30 Veterans Memorial Parkway | This property will be acquired to complete the proposed development. Located slightly upgradient. |
| 50 | Tony's Auto Service | 10 Pier Road | 0.10 miles west - downgradient |
| 41 | Parker Manufacturing Corp. | 22 First Street | 0.05 miles north - downgradient |
| 51 | Union Oil Company of California | 1 Pier Road | 0.10 miles west - downgradient |

3.22.1b - Warren Avenue Interchange

There are two facilities in the vicinity of the subject intersection that are included on the RCRA as listed below.

| FirstSearch Identification Number | RCRA Facility | Address | Presumed Hydrologic Position Relative to Site |
|-----------------------------------|-----------------------------|-------------------|---|
| 11 | Barbosa & Sons Auto Service | 317 Warren Avenue | 0.3 miles southeast - upgradient |
| 25 | Fairlawn Transmission | 354 Warren Avenue | 0.35 miles southeast - upgradient |

3.22.1c - Valley Street and Taunton Avenue Intersection

There are seven facilities in the vicinity of the subject intersection that are included on the RCRA as listed on the following page.

| FirstSearch Identification Number | RCRA Facility | Address | Presumed Hydrologic Position Relative to Site |
|--|---|-------------------|--|
| 39 | Munroe A B Dairy, Inc. | 151 Brow Street | 0.10 miles northeast- may not be upgradient |
| 35 | Kelley Metals Corp. | 115 Valley Street | 0.05 miles northeast- may not be upgradient |
| 7 | American Equipment & Fabricating Corp. | 100 Water Street | 0.02 miles west - downgradient |
| 26 | Fortune Metal, Inc. | 105 Valley Street | 0.05 miles north - may be upgradient |
| 24 | Exxon Company USA | 69 Taunton Avenue | 0.15 miles east - upgradient |
| 8 | American Mobile Lube | 8 Warren Avenue | Buildings demolished in Spring 2004 - downgradient |
| 38 | Motoring Technical Training | 54 Water Street | 0.15 miles southwest - downgradient |

3.22.2 Underground Storage Tank (UST) Program

The RIDEM maintains a database of facilities that have or have had registered underground storage tanks (USTs). It should be noted that facilities with USTs may not be registered with RIDEM, and the presence and locations of such tanks are unknown. In addition, RIDEM's registration requirements do not apply to residential USTs where heating oil is consumed on site. Specific information regarding the registered tanks are attached in Appendix D.

There are 21 facilities in the vicinity of the project site that have or have had USTs, the following four facilities all have existing USTs registered with RIDEM. The remaining 17 facilities are registered with the RIDEM but have been permanently closed.

- There are two USTs at Munroe Dairy, Inc that are cross-gradient to the proposed Valley Street and Taunton Avenue intersection. One tank was installed in 1986 and the second was installed in 2001.
- There are three USTs at Allied Exxon Gas Station that are upgradient from the proposed Taunton Avenue and Valley Street intersection and were installed in 1995.

- There are two USTs at 100 Water Street that are immediately down-gradient of the proposed Valley Street and Taunton Avenue intersection and were installed in 1991.
- There is one existing UST at Sacred Heart Church-School that is up-gradient of the proposed Valley Street and Taunton Avenue intersection.

3.23 RIDEM Division of Groundwater & ISDS

Groundwater Division Planning Unit maps were reviewed. These maps include the locations of facilities identified by the Underground Injection Control (UIC) Unit. UIC systems include lagoons, injection wells and large volume septic systems. The Planning Unit maps also show locations of landfills, surface water impoundments, salt storage facilities and community water supply wells.

In 1988 an Underground Injection Control Order was issued by RIDEM for disposal of wash water from a wash stand used to clean vehicles at the AGR Property at 100 Water Street. Groundwater observation wells were installed in accordance with this order and one of these wells is monitored annually. The system is located in the yard just north of the main buildings.

Groundwater classification overlays were also reviewed. Groundwater classified as GA or GAA is presumed suitable for human consumption without treatment. Groundwater classified as GB is presumed to be unsuitable for consumption without treatment. The Groundwater Classification and Well Protection Area - Providence Quadrangle Map classifies the groundwater within the project limits as GB. The site is not within any wellhead protection area. The project location is also upgradient from the Seekonk River.

4.00 LOCATION RECONNAISSANCES

Mr. Ernest H. Dessert and Mr. Brad C. Owens conducted exterior location reconnaissances. The purpose of these visits was to observe features of potential environmental concern abutting the project locations. These observations are outlined below and site features are depicted on Figures 2A through 2C.

A partial listing of commercial/industrial facilities located in each area proposed for improvement is provided below. The facilities listed are those that would potentially use or store hazardous materials or potentially have USTs. Residential properties and businesses such as day care centers were excluded from the list below.

4.10 VETERANS MEMORIAL PARKWAY ROUNDABOUT

The predominant feature of potential environmental concern at the subject intersection is the property located west of the subject intersection, Tockwotton Home. The other properties abutting the intersection include the Chapel Building Corporation, located southwest of the

intersection, the East Providence Electrical Substation, located to the south of the intersection, and the property now occupied by Lucien's Auto Repair Service. The following table indicates a listing of the features in this area.

| FirstSearch Identification Number | Property | Approx. Distance From Intersection |
|---|---|---|
| North of Intersection Along First Street | | |
| D 41 | Povar Animal Hospital Parker Manufacturing | 0.06 miles (downgradient) 0.04 miles (downgradient) |
| East of Intersection Along Mauran Avenue | | |
| 36 | Lucien's Auto Repair Service | This property will be acquired to complete the proposed development. |
| South of Intersection Along Second Street | | |
| E | Chapel Building | This property will be acquired to complete the proposed development. 0.03 miles (upgradient) |
| F | E. P. Electrical Sub-Station | |
| West of Intersection Along Mauran Avenue | | |
| 180 | Tockwotton Home | 0.07 miles (downgradient) |

4.20 WARREN AVENUE INTERCHANGE

The predominant feature of potential environmental concern near the subject intersection is the Glanville Property located at 109-111 Warren Avenue, presently occupied by Johnny's Auto Repair. The following table indicates a listing of the features in this area.

| FirstSearch Identification Number | Property | Approx. Distance From Intersection |
|--|-----------------------------|---|
| South of the Interchange on Warren Avenue | | |
| G | St. Mary's Episcopal Church | 0.01 miles cross-gradient |
| Southeast of the Interchange on Warren Avenue | | |
| 223 | Johnny's Auto Repair | 0.09 miles up-gradient |

4.30 VALLEY STREET AND TAUNTON AVENUE INTERSECTION

The predominant feature of potential environmental concern at the subject intersection is the Organic Dyestuffs Corporation (formerly Fox Fertilizer), which is located northeast of the intersection of Valley Street and Taunton Avenue, at 68 Valley Street. The site is currently listed as a RCRA site with the RIDEM. To the south of the subject intersection is I-195 westbound. The property located immediately west of the intersection, on Water Street, is occupied by American Equipment & Fabricating Corporation. This site is also listed as a RCRA site with the RIDEM. The following table indicates a listing of the features in this area.

| FirstSearch Identification Number | Property | Approx. Distance From Intersection |
|--|---|--|
| Northeast of Intersection Along Valley Street | | |
| H | Organic Dyestuffs Corporation (formerly Fox Fertilizer) | The proposed alignment crosses this property. |
| I | Newsletter Press | 0.05 miles (cross gradient) |
| 26 | Fortune Metals | 0.05 miles (cross gradient) |
| 35 | Kelly Metals Corporation | 0.08 miles (cross gradient) |
| J | W. J. Canaan, Inc. - Fruit & Produce (formerly Kraus Chemical Company) | 0.10 miles (cross gradient) |
| K | Tony's Tire Service | 0.13 miles (cross gradient) |
| 39 | Munroe Dairy, Inc. (N. Brow Street) | 0.15 miles (upgradient) |
| East of Intersection Along Taunton Avenue | | |
| 24 | Alliance Exxon Gasoline Station | 0.15 - miles (upgradient) |
| L | Sacred Heart Church-School | 0.15 - miles (upgradient) |
| West of Intersection Along Water Street | | |
| 7 | American Equipment & Fabricating Corporation | 0.02 miles (downgradient) |

5.00 SUMMARY

A combination of initial site assessment (ISA) and preliminary site investigation (PSI) activities were conducted for three options where the RIDOT is planning traffic/intersection improvements. The purpose of these activities was to render an opinion as to whether oil or hazardous materials

are present in soil or groundwater at the subject location, since contaminants, if present, may impact construction costs and worker health and safety. Summaries of relevant findings and conclusions concerning each option are grouped by location and provided below and on the following pages.

5.10 VETERANS MEMORIAL PARKWAY ROUNDABOUT

The improvements planned at this location will consist of excavations to allow for construction of a new roundabout and connections to existing roadways. A summary of relevant findings is listed below:

- Based on a review of the USGS topographical map of the Providence quadrangle, it is anticipated that the direction of groundwater flow in the vicinity of the intersection is to the west and north towards the Seekonk River. Groundwater in the vicinity of the site is classified by RIDEM as GB which indicates that groundwater is presumed to be unsuitable for consumption without treatment.
- There are seven facilities within 1/4-mile of the site that have or have had a registered UST. Four of the facilities are immediately adjacent to the site, and three of the facilities are upgradient, the remaining one is not anticipated to be directly upgradient of the intersection.
- There was one petroleum or hazardous material spill in the vicinity of the project location. The spill occurred at 28 Boston Street in October 1995. The incident involved the release of 220 gallons of oil/degreaser. This property is located downgradient from the proposed improvements.
- There are four RCRA-registered facilities within 1/4-mile of the subject intersection all of which are classified as small quantity generators. One of these facilities is located upgradient of the proposed roundabout (Lucien's Auto Repair). This property will be acquired to complete the proposed development. The remaining three facilities are northwest of the intersection and anticipated to be downgradient of the project site.
- There is one RIDEM-listed hazardous waste site located within a 1/4 mile west of the proposed Roundabout, Tockwotton Home. This site is listed as active with RIDEM, this site is not upgradient and it is not anticipated that activities at the site have had adverse impacts to soil or groundwater at the proposed roundabout location.

5.20 WARREN AVENUE INTERCHANGE

The improvements planned at this intersection will consist of excavations to construct several new interchanges, overpasses, and retaining walls. A summary of relevant findings is listed below:

- Based on a review of the USGS topographical map of the Providence quadrangle, it is anticipated that the direction of groundwater flow in the vicinity of the intersection is to the

west and north towards the Seekonk River. Groundwater in the vicinity of the site is classified by RIDEM as GB which indicates that groundwater is presumed to be unsuitable for consumption without treatment.

- There are two facilities within 1/4-mile of the site that have or have had a registered UST. These facilities are anticipated to be upgradient of portions of the work. These facilities are Johnny's Auto Repair and the Warren Avenue Apartments, located at 182 Warren Avenue. Records indicate that the UST at each location has been permanently closed.
- There is one facility that has had a leaking UST (LUST) within 1/2-mile of the site. This facility, Johnny's Auto Repair, is anticipated to be upgradient of portions of the work.
- There was one reported emergency response on I-195 westbound, beneath the Potter Street overpass. Records indicate that 20 gallons of fuel and 20 gallons of oil were spilled on the highway. The Fire Department reportedly applied absorbent material and Clean Harbors responded. It is anticipated that the spill was within the limits of the work.
- There were three petroleum or hazardous material spills in the vicinity of the subject intersection. The first one occurred at 82 Warren Avenue immediately adjacent to the intersection in March 1995. The incident involved the release of 10 gallons of hydraulic oil. Thirty to forty gallons of fuel oil was spilled at the intersection of Freeborn Street and Purchase Street in January 1994. The third spill occurred at 51 North Phillips Street in June 1998. This incident involved the release of 10 gallons of paint.
- There are no RCRA-registered facilities within 1/4-mile of the subject intersection.
- There are no RIDEM-listed hazardous waste sites located within a 1/4 mile of the subject intersection.

5.30 WATERFRONT DRIVE EXTENSION/ TAUNTON AVENUE INTERCHANGE

The improvements planned at this location will consist of excavations to allow for construction of a new overpass and retaining walls on the Taunton Avenue / I-195 West Interchange, located southwest of the Valley Street and Taunton Avenue intersection. A summary of relevant findings is listed below:

- Based on a review of the USGS topographical map of the Providence quadrangle, it is anticipated that the direction of groundwater flow in the vicinity of the intersection is to the west and north towards the Seekonk River. Groundwater in the vicinity of the site is classified by RIDEM as GB which indicates that groundwater is presumed to be unsuitable for consumption without treatment.
- There are eight facilities in the vicinity of the project location that have or have had a registered UST. Alliance Exxon gasoline station has three 12,000-gallon gasoline storage tanks and is directly upgradient of the intersection. The Sacred Heart Church and School

has a 5,000-gallon fuel oil UST and is directly upgradient of the intersection. Munroe Dairy, Inc. has an existing 300-gallon fuel oil UST and an existing 10,000-gallon gasoline UST. The tanks at Munroe Dairy are not anticipated to be upgradient of the project location. American Equipment & Fabricating Corporation, located at 100 Water Street, has an existing 3,000-gallon diesel UST and an existing 5,000-gallon gasoline UST. American Equipment & Fabricating Corporation is directly downgradient of the intersection.

- Leaking USTs were reported at the Exxon gasoline station, which is located at 69 Taunton Avenue and is immediately upgradient of the intersection. Monitoring wells have been installed at the site. In March 1999, the RIDEM issued a letter stating that “no further action” is required at this site. The status of this site is now listed as Inactive. Leaking USTs were also reported at American Equipment & Fabricating Corporation, located immediately downgradient of the intersection, this site has also been issued a UIC order by the RIDEM. Observation wells have been installed on this property and are monitored annually, this site is considered Active by RIDEM.
- There are seven RCRA-registered facilities within 1/4-mile of the subject intersection, all of which are classified as small quantity generators. One of these facilities is located upgradient of the intersection, Alliance Exxon at 69 Taunton Avenue. The remaining six sites are north of the intersection and are not anticipated to be upgradient of the project site.
- There was one CERCLIS site, Koppers Company - Providence Plant, listed within a 1/4 mile of the intersection. This site is not anticipated to be upgradient of the project site. This site is currently occupied by the existing Henderson Bridge, this site is listed as Inactive by the EPA and no further remediation action is necessary.
- There were two hazardous waste sites listed by the RIDEM, located within a 1/4 mile of the Valley Street and Taunton Avenue intersection, Kraus Chemical and Fox Fertilizer. Both of these sites are listed as Active with RIDEM. One of these sites, Fox Fertilizer, is located within the limits of the proposed work. The proposed access to Waterfront Drive crosses through this property in all three considered alignment alternatives. The second site, Kraus Chemical, is north of the intersection and it is not anticipated that activities at this site have had adverse impacts to soil or groundwater at the project location.
- There were two petroleum or hazardous material spills in the vicinity of the Valley Street and Taunton Avenue intersection. Both of the incidents are located upgradient of the intersection and may have adversely impacted soil and/or groundwater at the intersection. Reports also indicated an incident involving the spill of an unknown volume of dye on Valley Street and may possibly be upgradient. The records did not indicate where on the property the spill occurred or what remediation effort was performed, if any.

6.00 CONCLUSIONS

Based upon the historical and file data collected, and the observed surficial conditions, it is PBA's opinion that gasoline and or other petroleum products may be present in the soil or groundwater at all three of the proposed work sites indicated in the alternatives under consideration; Waterfront Drive-1, Waterfront Drive-2, and Veterans Memorial Parkway-1.

Leaking USTs were reported at the Exxon Gasoline Station, which is located immediately upgradient of the proposed Taunton Avenue and Valley Street intersection. An active hazardous waste site, Fox Fertilizer, is also located within the proposed work limits. In all three of the alignment alternatives under consideration, construction would take place on this property in order to provide access to the Waterfront Drive Extension.

At the proposed Warren Avenue and I-195 East Interchange location, leaking USTs were reported at Johnny's Auto Repair. This facility is upgradient of the subject intersection.

We did not find specific records of spilled gasoline or other petroleum products in the soil or groundwater at or upgradient of the location of the proposed Veterans Memorial Parkway Roundabout. However, there is a RCRA site (Lucien's Auto Repair) located upgradient and several USTs which have been removed. An active hazardous waste site, Tockwotton Home, is located within 1/4 mile of the proposed roundabout. This site is believed to be downgradient and is not anticipated to have an impact on the proposed intersection.

7.00 RECOMMENDATIONS

Based upon the results of the historical research completed for this area, it is possible that some oil or hazardous materials could be encountered during the construction of the proposed improvements at the Valley Street and Taunton Avenue intersection, Veterans Memorial Parkway Roundabout, Waterfront Drive extension, and Warren Avenue interchange.

We do not have any specific information on depths to groundwater beneath the site, however we would anticipate that during parts of the year the groundwater may be close to the ground surface. It is also likely that excavations extending to or below the groundwater level will be required in order to complete the proposed improvements.

We therefore recommend that Phase II activities be initiated. A field program consisting of monitoring well installations to depths of ten feet below groundwater to allow groundwater level readings should be completed. Groundwater Observation Wells are recommended at each of the following locations:

- At the location of the Valley Street and Taunton Avenue intersection.
- At the location of the proposed Waterfront Drive off-ramp, overpass and retaining walls.
- At the location of the proposed Veterans Memorial Parkway Roundabout.

- At the location of the proposed improvements to the Warren Avenue interchange, new Potter Street and Purchase Avenue overpasses, and the School Street retaining wall.

Soil samples from the test borings should be screened for volatile organic compounds (VOCs) and selected samples that register VOCs should be submitted to a laboratory for VOC analysis. Samples of groundwater should also be obtained and submitted to a laboratory for VOC analysis.

Should the scope of construction activities change from those anticipated and described in this report, then these recommendations and the need for additional site assessment activities should be reviewed at that time. This report and any additional information should be made available to construction bidders.

8.00 LIMITATIONS

PBA's site assessment was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area, and we observed that degree of care and skill generally exercised by other consultants under similar circumstances and conditions. Our findings and conclusions must be considered not as scientific certainties, but rather as our professional opinion concerning the significance of the limited data gathered during the course of the environmental site assessment. This study is not intended to evaluate whether existing facility occupants are in compliance with applicable environmental regulations. No other warranty, express or implied, is made. Specifically, PBA does not and cannot represent that the site contains no hazardous material, oil, or other latent condition beyond that observed by PBA during our site evaluation. This report is also subject to the specific limitations outlined in Appendix A.

TABLE

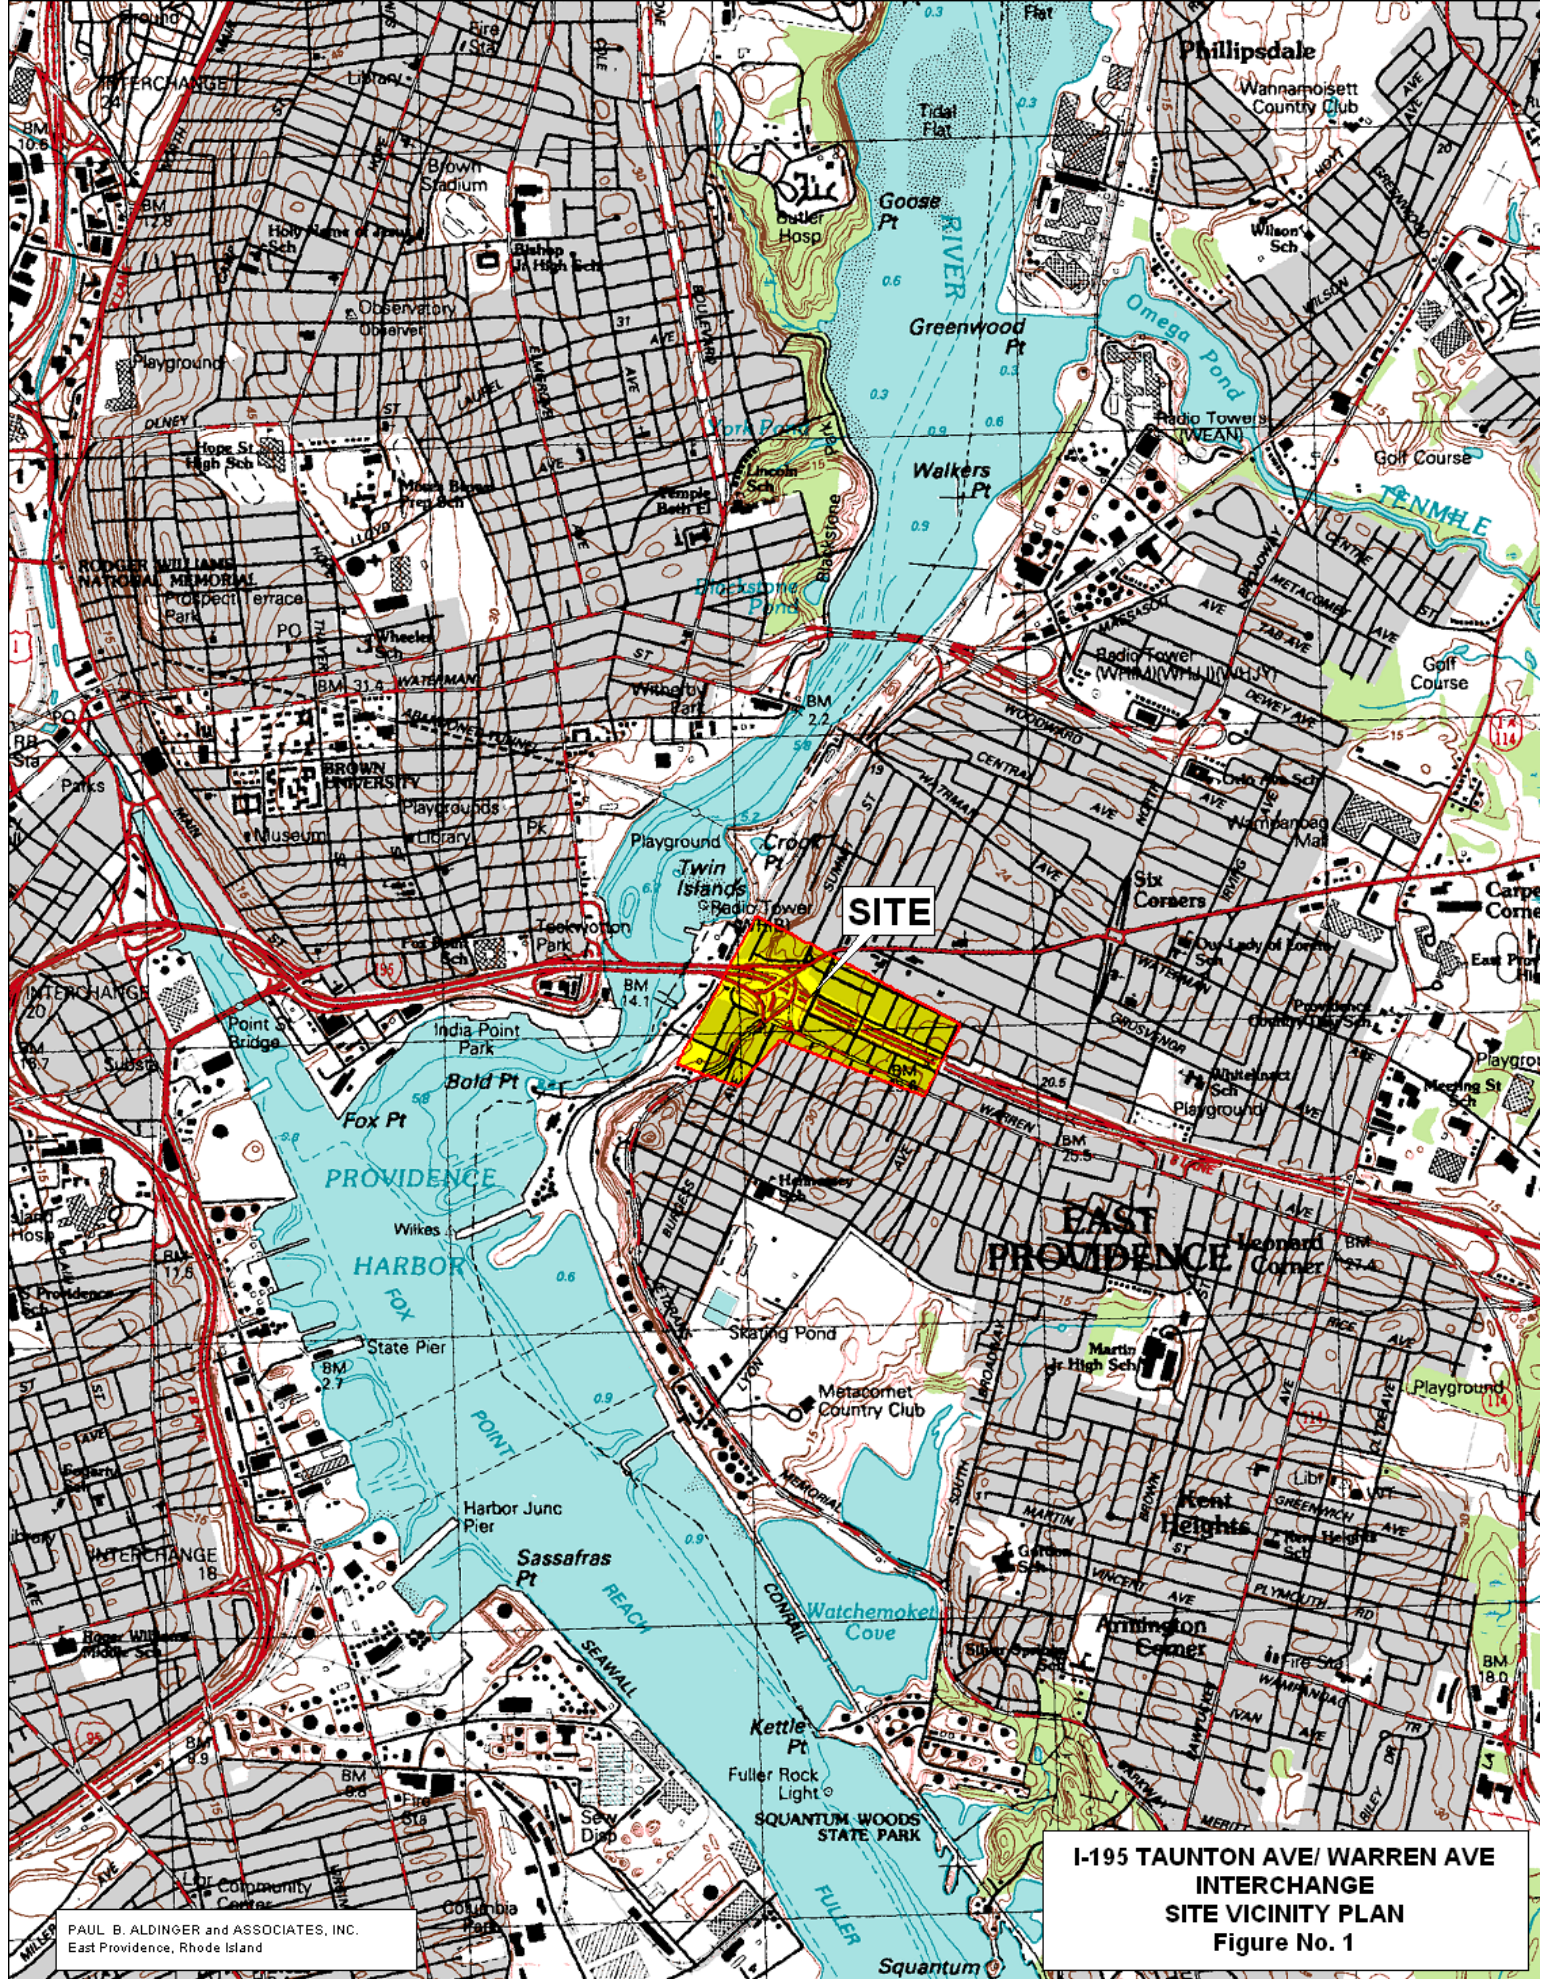

Table 1 - Site Identification Numbers

| FirstSearch Identification Number | Facility/Description | Address |
|--|-----------------------------------|-------------------------------|
| 2* | Koppers Company, Providence Plant | Route 195 at Massasoit Avenue |
| 7 | AGR Properties | 100 Water Street |
| 8 | American Mobile Lube | 8 Warren Avenue |
| 11 | Barbosa & Sons Auto Service | 317 Warren Avenue |
| 24 | Exxon Gasoline Station | 69 Taunton Avenue |
| 25 | Fairlawn Transmission | 354 Warren Avenue |
| 26 | Fortune Metal, Inc. | 105 Valley Street |
| 35 | Kelley Metals Corp. | 115 Valley Street |
| 36 | Lucien's Auto Center, LLC | 30 Veterans Memorial Parkway |
| 37 | Warren Petroleum | 101 Taunton Avenue |
| 38 | Motoring Technical Training | 54 Water Street |
| 39 | Munroe A B Dairy, Inc. | 151 Brow Street |
| 41 | Parker Manufacturing Corp. | 22 First Street |
| 50 | Tony's Auto Service | 10 Pier Road |
| 51* | Union Oil Company of California | 1 Pier Road |
| 180 | Tockwotton Home | 99 Mauran Avenue |
| 188 | Fuel oil spill | 220 Warren Avenue |
| 190 | Oil/degreaser spill | 28 Boston Street |
| 193 | Paint spill | 51 North Phillips Street |
| 195 | Hydraulic oil spill | 82 Warren Avenue |
| 201 | No. 2 fuel oil spill | 144 Freeborn Avenue |
| 204 | Transformers dumped | Unspecified Address |
| 205 | Dye spill | Unspecified Address |
| 223 | Glanville Property | 111 Warren Avenue |

| Map Identification | Facility/Description | Address |
|---------------------------|---|---|
| A | Heating oil spill | 51 Seventh Street |
| B | Oil spill | 199 South Hull Street |
| C* | Petroleum oil spill | Waterman & Massasoit Avenues |
| D | Povar Animal Hospital | 15 First Street |
| E | Chapel Building | 33 Veterans Memorial Parkway |
| F | E. P. Electrical Sub-Station | Second Street & Veterans Memorial Parkway |

APPENDIX A
LIMITATIONS

APPENDIX A LIMITATIONS

A. Explorations

1. A Phase I site assessment took into account the natural and manmade features of the site including any unusual or suspect phenomenon. These factors combined with the site's geology, hydrology, topography and past and present land uses served as a basis for choosing a methodology and location for subsurface explorations as well as subsurface soil sampling. The subsurface data generated is meant as a representative overview of the site.
2. The analyses and recommendations submitted in this report are based in part upon the data obtained from subsurface explorations. The nature and extent of variations between these explorations may not become evident until construction. If variations then appear evident, it will be necessary to reevaluate the recommendations of this report.
3. The generalized soil profiles described in the text are intended to convey trends in subsurface conditions. The boundaries between strata are approximate and idealized and have been developed by interpretations of widely spaced explorations and samples; actual soil transitions are probably more erratic. For specific information, refer to the boring logs.
4. Water level readings have been made in the observation wells at times and under conditions stated on the boring logs. These data have been reviewed and interpretations have been made in the text of this report. However, it must be noted that fluctuations in the level of the groundwater may occur due to variations in rainfall, temperature, tide and other factors occurring since the time measurements were made.

B. Review

The test boring and monitoring well locations, and the subsequent conclusions of this report are based in part on the planned construction activities at the site. In the event that any changes in the nature, design, or location of the proposed structures are planned, the conclusions and recommendations contained in this report shall not be considered valid unless the changes are reviewed and conclusions of this report are modified or verified in writing by Paul B. Aldinger & Associates, Inc.

C. Use of Report

1. This report has been prepared for the exclusive use of Gordon R. Archibald & Associates, Inc., and the State of Rhode Island Department of Transportation for specific application to the proposed Improvements to the I-195/Taunton Avenue/Warren Avenue Interchange in East Providence, Rhode Island. The conclusions and recommendations presented in this report are based on limited data and our best judgement as to whether significant subsurface contamination may be present. We have used the average standard of care exercised by similar professionals conducting similar studies in the same geographic area and during the same time frame. No other

warranty, express or implied, is made. Our findings and conclusions must be considered not as scientific certainties, but rather as our professional opinion concerning the significance of the limited data gathered during the course of the environmental site assessment. Specifically, PBA does not and cannot represent that the site contains no hazardous material, oil, or other latent condition beyond that observed by PBA during our site evaluation.

2. This environmental report has been prepared for this project by Paul B. Aldinger & Associates, Inc. The observations described in this report were made under the conditions stated therein. The conclusions presented in this report were based solely upon the services provided, and are not based on scientific tasks or procedures beyond the scope of provided services, or the time or budgetary constraints imposed by the Client.

3. Where access to portions of the site locations was limited, PBA assumes no responsibility for reporting evidence of oil or hazardous materials in these areas.

4. It was not the intent of this assessment to evaluate whether facilities abutting the project locations comply with applicable regulations concerning the handling or disposal of hazardous materials.

Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

Environmental FirstSearch Federal Database Descriptions

ASTM Databases:

CERCLIS: *Comprehensive Environmental Response Compensation and Liability Information System.* The EPA's database of current and potential Superfund sites currently or previously under investigation. Source: Environmental Protection Agency.

Updated quarterly.

CERCLIS-NFRAP (Archive): *Comprehensive Environmental Response Compensation and Liability Information System Archived Sites.* The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Updated quarterly.

ERNS: *Emergency Response Notification System.* The EPA's database of emergency response actions. Source: Environmental Protection Agency. Data since January, 2001, has been received from the National Response Center as the EPA no longer maintains this data.

Updated quarterly.

FINDS: *The Facility Index System.* The EPA's Index of identification numbers associated with a property or facility which the EPA has investigated or has been made aware of in conjunction with various regulatory programs. Each record indicates the EPA office that may have files on the site or facility. Source: Environmental Protection Agency.

Updated semi-annually.

NPL: *National Priority List.* The EPA's list of confirmed or proposed Superfund sites. Source: Environmental Protection Agency.

Updated quarterly.

RCRIS: *Resource Conservation and Recovery Information System.* The EPA's database of registered hazardous waste generators and treatment, storage and disposal facilities. Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List). Source: Environmental Protection Agency.

RCRA TSD: *Resource Conservation and Recovery Information System Treatment, Storage, and Disposal Facilities.* The EPA's database of RCRIS sites which treat, store, dispose, or incinerate hazardous waste. This information is also reported in the standard RCRIS detailed data.

ASTM Database Descriptions (continued):

RCRA COR: *Resource Conservation and Recovery Information System Corrective Action Sites.* The EPA's database of RCRIS sites with reported corrective action. This information is also reported in the standard RCRIS detailed data.

RCRA GEN: *Resource Conservation and Recovery Information System Large, Small, and Very Small Quantity Generators.* The EPA's database of RCRIS sites that create hazardous waste or meet other RCRA requirements. Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List).

RCRA NLR: *Resource Conservation and Recovery Information System sites No Longer Regulated.* FirstSearch's proprietary database of Resource Conservation and Recovery Information System's that the EPA cannot categorize.

All RCRA databases are Updated quarterly

Environmental FirstSearch Federal Database Descriptions

Non-ASTM Databases:

HMIRS: *Hazardous Materials Incident Response System.* This database contains information from the US Department of Transportation regarding materials, packaging, and a description of events for tracked incidents.

Updated quarterly.

NCDB: *National Compliance Database.* The National Compliance Data Base System (NCDB) tracks regional compliance and enforcement activity and manages the Pesticides and Toxic Substances Compliance and Enforcement program at a national level. The system tracks all compliance monitoring and enforcement activities from the time an inspector conducts and inspection until the time the inspector closes or the case settles the enforcement action. NCDB is the national repository of the 10 regional and Headquarters FIFRA/TSCA Tracking System (FTTS). Data collected in the regional FTTS is transferred to NCDB to support the need for monitoring national performance of regional programs.

Updated quarterly

NPDES: *National Pollution Discharge Elimination System.* The EPA's database of all permitted facilities receiving and discharging effluents. Source: Environmental Protection Agency.

Updated semi-annually.

NRDB: *National Radon Database.* The NRDB was created by the EPA to distribute information regarding the EPA/State Residential Radon Surveys and the National Residential Radon Survey. The data is presented by zipcode in Environmental FirstSearch Reports. Source: National Technical Information Service (NTIS)

Updated Periodically

Nuclear: The Nuclear Regulatory Commission's (NRC) list of permitted nuclear facilities.

Updated Periodically

PADS: PCB Activity Database System

The EPA's database PCB handlers (generators, transporters, storers and/or disposers) that are required to notify the EPA, the rules being similar to RCRA. This database indicates the type of handler and registration number. Also included is the PCB Transformer Registration Database.

Updated semi-annually.

Receptors: 1995 TIGER census listing of schools and hospitals that may house individuals deemed sensitive to environmental discharges due to their fragile immune systems.

Updated Periodically

Non-ASTM Database Descriptions (continued):

RELEASES: *Air and Surface Water Releases.* A subset of the EPA's ERNS database which have impacted only air or surface water.

Updated semi-annually.

Soils: This database includes the State Soil Geographic (STATSGO) data for the conterminous United States from the United States Geographical Survey (USGS).. It contains information regarding soil characteristics such as water capacity, percent clay, organic material, permeability, thickness of layers, hydrological characteristics, quality of drainage, surface, slope, liquid limit, and the annual frequency of flooding. National Resources Conservation Services Soil Survey Geographic(SSURGO) database, and the USGS Digital Data Series bedrock data.

Updated annually

TRIS: *Toxic Release Inventory System.* The EPA's database of all facilities that have had or may be prone to toxic material releases.
Source: Environmental Protection Agency.

Updated semi-annually.

Federal Wells: The United State Geographic Survey(USGS)
Groundwater Inventory Sites

Updated annually

**Environmental FirstSearch
Rhode Island Database Descriptions**

1. **Spills:** The RI Department of Environmental Management's list of Oil and Chemical Spills produced by the Division of Site Remediation.

Updated quarterly.

2. **Landfills:** The RI Department of Environmental Management's listing of Solid Waste Management Facilities maintained by the Division of Waste Management.

Updated annually.

3. **UST:** Underground Storage Tanks. The RI Department of Environmental Management's database listing of the Underground Storage Tanks Facility Master List maintained by the Underground Storage Tank Section of the Division of Waste Management.

Updated quarterly.

4. **PWS:** Public Water Supplies. The RI Department of Administration's database of public water supply locations maintained by the Division of Planning/RIGIS.

Updated annually.

5. **STATE:** The RI Department of Environmental Management's database of CERCLA/STATE sites. The database contains location and project information.

Updated quarterly.

6. **AQUIFERS:** University of Rhode Island database of RI State Aquifers

Updated annually

7. **LUST:** Leaking Underground Storage Tanks. Rhode Island Department of Environmental Protection database of LUST sites

Updated quarterly

8. **HISTORIC SITES:** The historic districts, sites, and candidate sites on the National Historic Register as listed by the Rhode Island Historic Preservation Commission.

Updated annually.

**Environmental FirstSearch
Massachusetts Database Descriptions**

1. **State Sites:** Confirmed Disposal Sites and Locations To Be Investigated. The Department of Environmental Protection Agency database of confirmed, LTBI, waiver, deleted and reserved sites maintained by the Bureau of Waste Site Cleanup.

Updated immediately upon release.

2. **Spills:** The Department of Environmental Protection Agency database of emergency response actions and spill releases maintained by the Bureau of Waste Site Cleanup.

Updated immediately upon release.

3. **Landfills:** The Department of Environmental Protection Agency database of active solid waste landfill facilities maintained by the Division of Solid Waste Management.

Updated annually.

4. **UST:** Underground Storage Tanks. The Department of Public Safety/Office of the Fire Marshall's database of registered underground storage tanks.

Updated semi-annually.

5. **PWS:** The Department of Environmental Protection Agency's database of public water supply well locations maintained by the Division of Water Supply and MassGIS.

Updated semi-annually.

6. **Aquifers:** The Executive Office of Environmental Affairs GIS database of high, medium and low yield aquifers, EPA sole source aquifers, known zone II boundaries for public water supplies and surface water.

Updated annually.

7. **ACEC:** Areas of Critical Environmental Concern. The Executive Office of Environmental Affairs GIS database of legislated ACECs, protected open spaces, estimated habitats of endangered species and vernal pools.

Updated annually.

8. **LEAKING UNDERGROUND STORAGE TANKS:** Massachusetts Department of EPA database of emergency response actions and spill releases where the source is a tank.

Updated quarterly

9. **BROWNFIELDS:** Massachusetts Department of EPA database of Activity and Use Limitation (AUL). An AUL provides Notice to users of property of the presence of oil or hazardous material contamination remaining at the location after a cleanup has been conducted pursuant to M.G.L. Chapter 21E and the Massachusetts Contingency Plan. The AUL is a legal document that identifies activities and uses of the property that may and may not occur, as well as the property owner's obligation and maintenance conditions that must be followed to ensure the safe use of the property.

Updated quarterly
